YubiKey + Microsoft.
Your defense against account takeovers
Secure sign in. Easy to use. Phishing resistant.

The YubiKey offers the highest security and best user experience for protecting Microsoft 365.

- Phishing-resistant security proven to stop account takeovers
- Frictionless user experience
- Easy to scale and support
- Works with Azure Active Directory, Active Directory, and leading Identity and Access Management (IAM) solutions

Provide your ecosystem secure access to Microsoft apps with the leading security key

Remote workforce
Improve security and productivity for remote workers access to Microsoft 365 collaboration and productivity tools.

3rd party/Vendor access
Ensure secure corporate system access to Microsoft 365 workloads by 3rd party entities.

End customers
YubiKeys safeguard end customer accounts.

End account Takeovers
- Phishing-resistant to advanced Man-in-the-Middle attacks
- Hardware backed public-key cryptography
- Origin binding validates whether user is signing in to legitimate site

Frictionless user experience
- Login with a simple touch
- No need to enter cumbersome codes
- No passwords to remember

Easy to scale and support
- Easy to deploy and manage
- User self-service for provisioning, registration, and account recovery
- Highly durable, no batteries, screens, or moving parts

10 million YubiKeys deployed
Log in 4X Faster than 2FA
90% Reduction in help desk calls
Modern authentication with a touch

Integrated with leading IAM solutions
- Use YubiKeys to secure authentication to Microsoft Office applications that are federated via Identity and Access Management solutions such as Ping Identity, RSA, Okta, and Duo.

Native passwordless support with Azure AD
- The YubiKey can authenticate directly with Azure Active Directory accounts using passwordless logins (currently in public preview).

Works with Azure MFA and Active Directory
- Multi-protocol YubiKey 5 Series security keys enable logins using OTP via Azure MFA, as well as using smart card infrastructure to Active Directory accounts.

Access via Microsoft accounts
- The YubiKey is natively supported by Microsoft accounts enabling easy secure access to Microsoft 365 productivity, collaboration, and security tools.

Multi-protocol authentication support
The YubiKey supports multiple methods for authentication, enabling the same key to be used across services and applications.

WebAuth, FIDO2, U2F
Yubico co-authored leading industry standards with Microsoft and Google and is a founding member of the FIDO Alliance.

One time password
Enable Azure MFA by using the YubiKey OTP functionality, along with the multi-platform Yubico Authenticator software.

Smart card/PIV
YubiKeys can also function as smart cards simplifying deployments by removing smart card readers.

Yubico sets global standards for authentication
The YubiKey delivers strong hardware protection with a simple touch across any number of IT systems and online services. Multi-protocol YubiKeys support standard security protocols to ensure interoperability in complex enterprise environments.

Yubico is the principal inventor of the WebAuthn/FIDO2 and U2F authentication standards adopted by the FIDO alliance and is the first company to produce the U2F security key and a multiprotocol FIDO2/WebAuthn authenticator. Yubico’s technology is deployed and loved by 9 of the top 10 internet brands and by millions of users in 160 countries.

About Yubico
Yubico sets new global standards for easy and secure access to computers, servers, and Internet accounts. Founded in 2007, Yubico is privately held with offices in Australia, Germany, Singapore, Sweden, UK, and USA. Learn why nine of the top 10 internet brands and millions of users in more than 160 countries use our technology at www.yubico.com
