Protect your workforce with strong MFA

Security breaches are a growing, industry-wide problem. For organizations, security breaches can lead to disrupted business activities, reduced employee productivity, and stretched IT teams that must triage and remediate the security incident.

For organizations of all sizes that need to protect sensitive data at scale, Duo Security offers a user-centric zero trust for the workforce platform to protect access to all applications for all users on any device from anywhere. Duo multi-factor authentication (MFA) paired with Yubico’s YubiKey offers the super secure and easy-to-use authentication customers and employees love. Deploying strong authentication with Duo and the YubiKey is a fast, simple, and inexpensive process, thanks to the joint solution’s seamless compatibility with existing security infrastructure.

Zero trust made simple
Duo and Yubico together simplify strong authentication and enable businesses to meet customer needs. Authenticating with Duo and the YubiKey is remarkably easy and four times faster than typing codes.* Duo protects every point of access, from on-premises, to web-based, to cloud-based applications. Deployment is quick and easy, and the platform’s user-friendly authentication experience and intuitive administrator dashboard make managing your security protocols a breeze.

Trusted leaders
Duo and Yubico are proven leaders in security with the same tenacity and dedication to solving authentication challenges. Global enterprises like Facebook trust Duo and the YubiKey to protect their accounts, networks,

John “Four” Flynn, Information Security Manager, Facebook:
“Facebook is a very fast-paced environment and we needed technologies that would allow us to maintain that pace. Because of the ease of use of Duo Security and YubiKeys, we have seen minimal support and overhead costs. Other technologies, such as traditional OTP-based hardware tokens, smart cards, and biometrics didn’t fully support our need to allow multiple and rapid logins to SSH sessions.”

Duo works with the YubiKey 5 and Security Key by Yubico Series

and computers from unauthorized access. Duo puts your organization on the fast-track to zero trust by securing the modern workforce. The simple, all-in-one platform lets you verify user identities, assess and act on the health of devices, set adaptive access policies, and protect users’ productivity with modern remote access and single sign-on (SSO) capabilities.

**MFA for every business**
Deploying Duo and the YubiKey is fast, simple, and inexpensive. The joint solution integrates seamlessly into existing security infrastructure. The joint solution reduces IT operational costs and nearly eliminates help desk calls and end-user support tickets. Duo believes every organization should have a two-factor authentication (2FA) solution and provides a simple, yet scalable and effective security platform. With three editions and a host of capabilities built-in, Duo lets you choose the solution that’s perfect for your business.

---

“YubiKeys coupled with Duo multi-factor authentication provided an easily understood, implemented, and managed solution for RCS and their clients.”
