YubiKey as a Service – Enrollment

Enroll YubiKeys on behalf of users in multiple ways for fast user onboarding to YubiKeys and adoption.

Social engineering scams targets users and IT helpdesks

As the cyber threat landscape evolves with AI-powered attacks, malicious actors have devised new ways to target the user and the IT help desk in order to circumvent existing user verification processes. They can leverage stolen personally identifiable information of employees to easily answer security questions, after which point they can request a password reset and enroll a new device such as a smartphone to receive MFA codes. In this manner legacy MFA, including SMS text and even stronger forms of phishing-resistant MFA, is easily circumvented.

Once a hacker gains full access to the compromised employee's email account and other applications, they can change payment instructions with payment processors and divert legitimate payments to fraudulent bank accounts, take over the entire digital footprint of the employee and even deliver malware to the network, often creating the groundwork for a devastating ransomware attack.

YubiKey as a Service simplifies security and accelerates enterprise rollouts

YubiKey as a Service from Yubico offers smart enterprises a flexible and cost effective way to adopt modern cybersecurity at scale and protect the entire ecosystem including the workforce, suppliers and end customers.

Through YubiKey as a Service, customers are also eligible for additional services such as Enrollment services, where organizations can pre-enroll YubiKeys on behalf of users and enable faster YubiKey adoption.

With sophisticated cyber threats on the rise, smart organizations are choosing YubiKeys to secure digital identities. YubiKeys are modern hardware security keys that deliver the most secure passkeys and are proven to stop phishing scams and account takeovers in their tracks. The hardware form factor of the YubiKey ensures the secrets cannot be exfiltrated from the key and can easily stop remote attacks and other common breach methods. Organizations are also increasingly interested in relieving the IT helpdesk and users, who are not security experts, from having to stay up to speed on the latest nefarious cyber attack methods.

Enrolling YubiKeys on behalf of users, so that organizations equip users with the highest assurance MFA at all times is the way to build phishing-resistant enterprises.

Experience pre-configured YubiKeys, with Enrollment services

Through Enrollment services, enroll YubiKeys on behalf of users in multiple ways for fast user onboarding to YubiKeys and adoption.

There are two options available for you: you can pre-enroll YubiKeys on behalf of IT with FIDO Pre-reg, and on behalf of users with YubiEnroll to enable faster deployments. Think beyond phishing-resistant MFA, and fast-track the creation of phishing-resistant users. Enrolling YubiKeys on behalf of users, so that organizations equip users with the highest assurance MFA at all times, and getting the keys directly to users in a secure and efficient way is the way to build phishing-resistant enterprises.

YubiKeys deployed in:

9 of the top 10 global technology companies	**8 of the top 10** global banks*	**5 of the top 10** global retailers

*Not including banks based in China.

Yubico: Trusted by the world's most trusted brands

FIDO Pre-reg

FIDO Pre-reg offers a turnkey service that delivers factory pre-enrolled new YubiKeys to users, no matter where they are. Ideal for organizations with over 500 users, FIDO Pre-reg accelerates enterprises to create phishing-resistant users and go passwordless quickly and efficiently.

Available exclusively through YubiKey as a Service, FIDO Pre-reg handles all of the key delivery logistics door-to-door, and reduces burden for both IT staff and end users.

YubiEnroll

YubiEnroll enables organizations of all sizes to easily enroll YubiKeys on behalf of end users, or do so through partners, making going passwordless a snap.

With YubiEnroll, organizations can empower their IT team to enroll YubiKeys on short notice, or do so in certain geographies that cannot easily accommodate turnkey delivery services. With YubiEnroll, organizations that purchase YubiKeys can gain access to a client application that allows IT to enroll YubiKeys for the user and deliver them directly to the user.

The Enrollment services deliver a complete registration experience covering comprehensive enterprise needs, with support for Microsoft and Okta currently, and additional Identity Provider (IdP) support planned to come on board. Accelerate your journey to creating phishing-resistant users and say goodbye to passwords by becoming a truly phishing-resistant organization.
